

Peggy Gates Korth

- President Smart Ethanol, Inc. Manufacturers of Small to Midsized Biofuels Facilities.
- President Water Assurance Technology Energy Resources (WATER), a non-profit, 501-C3. Present duties include staff Training, business development, problem-solving, text development, organizational planning, clinical supervisor, project management, and consulting.

Projects and publications include a recent USDA SARE on-farm research grant Livestock and Feedstock: Distiller's Grain and Fuel Ethanol. Co-authoring one of the first fuel ethanol courses for small producers included presenting four seminars and numerous farmer's out-reach presentations. Continuing to write grants in behalf of biofuels for self-sufficiency, Ms. Korth proposed two additional grants for minority farmer participation and community involvement. The search for alternative feedstock joins remediation practices in cattail research. Publishing another co-authored work on infrastructure opportunities with renewable fuels shows an interest in all aspects of biofuels production and distribution.
